

BEACON LEGAL SOCIAL

Social Media Manager Playbook

V1 · your whole job — no code, no terminal.

How content gets made, reviewed, and posted — and exactly where you fit. You will never open a terminal. If something needs generating, you flag it to your engine lead.

Where you fit

You don't generate the content. The engine produces a month of posts for each client. Your job is the human part of the loop:

1 COLLECT

2 REVIEW

3 APPROVE

4 POST

Your four steps

1

Collect & upload the inputs

- Drop the client's filmed footage into their shared folder (**assets/uploads**).
- Make sure the intake is filled: firm, attorneys, city + **local notes**, practice area, brand color, the case types they want.
- The Local Intelligence Profile (real highways, intersections, seasonal patterns) is what makes hooks feel local — get it from the client.
- If anything's missing, the engine won't generate. Flag the gap, don't guess.

2

Review the content link

- Open the preview link. Each card is one post — read the hook, script or slides, and caption.
- Leave a note on anything; set **Approve** or **Request changes** per item.
- The small muted **INTERNAL** line is for us — ignore it.
- Hit **Copy all feedback** and send the bundle to your engine lead to regenerate the flagged items. Repeat until it's all approved.

3

Share the link (client or prospect)

- To send a review or a sales pitch, publish the HTML to the static host at the **unguessable path** you're given.
- Pitch links are one-per-prospect — the host's view count tells you when they looked. 4 opens last night = follow up today.

4

Post the approved assets

- Finished carousels are PNGs in **content/<month>/carousels/<id>/01.png...** — download and post in order.
- Reels are rendered MP4s — post as Reels / Shorts / TikTok.
- Post **natively** per platform; never blast the identical caption to all five.
- Use the client's timezone and the posting guide below.

Posting guide

Platform	Best times (local)	Treat it as
Instagram	7:30a / 5:30p	Familiarity
TikTok	12p / 7p	Discovery
YouTube (Shorts)	4p	Searchable authority
Facebook	8a	Local trust
LinkedIn	8a	Referral network — professional tone

LinkedIn is not TikTok. Keep it professional — no “comment CRASH 🗿” energy there.

Do & don't

DO	DON'T
• Post in the client's timezone. • Keep the Spanish variants for Spanish-speaking audiences (favor Facebook / WhatsApp). • Reply to comments and DMs quickly — engagement is the goal. • Use the rendered PNGs and MP4s as-is; they're already on-brand.	• Post identical content to all five platforms. • Use trending songs on a business account (they get muted / limited). • Invent case results or local facts — only what's in the client's files. • Touch the terminal. Generation requests go to your engine lead.

Not your job in V1 (yet)

Generating the content (the engine does it). Auto-scheduling — that's manual for now, and becomes automatic with Postiz in V2. The comment-to-DM funnel — also V2. For now: collect, review, post. That's the job.
